

Bingo

Have players create a game board consisting of 25 squares, containing a central FREE space and marked with a random arrangement of numbers from 1-75.

Example:

3	27	15	73	44
12	61	8	22	69
75	23	Free	57	14
63	48	1	32	29
15	71	43	50	4

Prepare 75 questions, on separate slips of paper. Draw a slip and read the number and question aloud. Players locate the number on their card and write the answer in space.

The first player to get a straight line of correct answers, either across, down or diagonally, wins the game. Make this game even more interesting by playing variations such as T, L, U, X, blackout, postage stamp, or picture frame.
